

## **Spring/Summer 2012 Collection**

The new eyewear collection by Just Cavalli seduces with glamorous and irresistible spirit: playful details and shapes of sparkling new models reflect the appeal of the iconic brand. Vintage-inspired shapes, refined details and irresistible colors win with original touches that will be impossible to resist.

Sophisticated and timeless : hyper-feminine sunglasses in acetate (JC406S) and metal (JC407S) fascinating with important profiles with soft shapes, decorated with refined elements of style such as animal print that outlines the profiles.

Acetate and injected combined between them in a game of contrasts brightens up the snake theme, from the wide and rounded forms inspired by the 1960's ( JC399S ) and also in the drop-shaped glasses from the sporty-chic taste (JC400S).

Surprisingly oversized dimensions and sculpted profiles the sunglasses are inspired by the 1950's dramatic look. The color palette follows the retro trend in soft shades and bolder colors.

Overlapping volumes between metal and injected now highlight the elegance of the sophisticated and eccentric cat shape(JC403S), now the bold and saucy silhouette widens(JC404S).

The colors that blend to redefine the size of the models from young and innovative characterize the butterfly-shaped glasses (JC408S) or elongated (JC409S). The two models have decorated arms and unusual volumes, distinctive signs of a young and unconventional mood.

For next spring / summer Just Cavalli Eyewear Collection even offers 4 unisex models with mask shapes in acetate (JC412S and JC413S ) and aviator shapes in acetate and metal ( jc411S and JC410S).
